

**Sarah Heinz House  
Risk Mitigation / Safety Guidelines  
Effective May 30, 2022**

**1. MASK POLICY:**

Most participant groups will be consistent with **Pittsburgh Public Schools Policy, which is dictated by ALLEGHENY COUNTY TRANSMISSION RATE (Low/Med/High)**. FYI, at this date, Allegheny County transmission Rate is MEDIUM.

CDC Link for County Check: <https://www.cdc.gov/coronavirus/2019-ncov/your-health/covid-by-county.html> . Data Provided by CDC with updates every Thursday by 8 pm ET.

- **SHH Youth & Teen Programming:**
  - Proposal: Mirror PPS Policy at SHH –
    - if LOW transmission rate, then masks OPTIONAL;
    - if MED or HIGH transmission rate, then masks REQUIRED is re-instated
- **SHH Adult Fitness: “Optional vs. Required”:** additional variable of consistency with Kids & Staff Policies (was also considered and discussed).
  - **General Adult Fitness:**
    - if LOW transmission rate, then masks OPTIONAL;
    - if MED or HIGH transmission rate, then masks REQUIRED is re-instated
  - **Structured (Bonnie) Classes:** Masks **REQUIRED for all class participants**, due to high poll numbers from class participants (more than half of respondents in those classes; Staff Member Bonnie will enforce)
  - **AM Corporate Basketball Group (Pirates):**
    - OPTIONAL when in Gymnasium, since it is a CLOSED, private Group who work together, and there is no exposure outside their group.
  - Rest of Building:
    - if LOW transmission rate, then masks OPTIONAL;
    - if MED or HIGH transmission rate, then masks REQUIRED is re-instated (take mask off as entering Gymnasium, put back on when leaving Gymnasium);

- **Staff Mask Guidelines:**
    - **If LOW Transmission Rate, then Masks Optional (same as SHH Youth & Teen and General Adult Fitness participants);**
    - if MED or HIGH transmission rate, then Masks REQUIRED is reinstated
  - **Fall Programming and Masks** – not determined yet; to be discussed at June Committee Meeting (analyze data and/or trends that may develop before then).
2. **ENTRY COVID SCREENING** (Summer Programming):  
**Committee unanimously voted YES** to Eliminate this process, effective May 30, 2022;
  3. **PARENTS/GUARDIANS IN BUILDING:**
    - a. **Summer 2022:** Same, Existing Policy for Summer 2022 (preschool parents only);
    - b. **FALL 2022:** All Parents/Guardians WILL BE PERMITTED back in the building when SHH Fall Programming Begins in September.
  4. **RESIDENT CAMP: HHC Covid Policy Changes:**
    - i. **Masks at Camp;**  
**Will NOT be required at Resident / Overnight Camp,** due to negative tests for all departing Camp Personnel;  
  
Inside of Sarah Heinz House will be dictated by Allegheny County Transmission Rate (Low = masks optional);
    - ii. **Elimination of Pre-Quarantine:** this process will NO LONGER be a requirement for Resident Campers or Staff.
    - iii. **Type of Covid Test:** **Must STILL BE A PCR Test.** Result must be provided, same as 2021, for Resident Camp.
    - iv. **Resident Camper Illness / Send Home Scenarios / Testing CHANGE:**
      1. If a camper is ill and last years' criteria are met for send home, then the new procured will be:
        - a. IF HHC has inventory of the Government-supplied rapid tests, then staff can administer the rapid test; if the test is negative, then the camper does NOT have to go home (as per Handbook procedure), but may stay and be treated as non-Covid illness.
        - b. If HHS does NOT have inventory of Government-supplied rapid tests, then the parent is called and must come to camp, as per previous policy.

- i. IF the family can bring one of the Government rapid tests, and the camper tests negative, then the camper may stay at camp and be treated as non-Covid illness.
  - ii. IF the family can bring one of the Government rapid tests, and the camper tests positive, then the camper must be taken home to quarantine.
  - iii. If the family cannot bring a government-supplied test, then they must come to pick up the camper, and take camper home to be tested, as per previous 2021 policy
- v. **All Resident Campers in Dining Hall** same time? Or still use porches to spread out? (Considering that everyone tested negative before going to camp)
  - 1. **Status for each session will be determined 1 day before each session begins**, based on current data available (possible data, for example, might be transmission rate, etc.).
  - 2. Each session decision will be kept consistent for THAT session.
